

The new **Qboidz™** system combines the award-winning snap-fit connectivity of Engino® system with the effortless building feature of stackable blocks! The system encourages preschool children to develop their cognitive, social and motor skills through fun and creative play. The **Qboidz™** development is based on the latest pedagogical principles of STEM (Science, Technology, Engineering and Mathematics), aiming to provide both girls and boys with the necessary experience, skills and knowledge to cope with the technological advancements of the future. The parts are suitable even for 2 year olds but due to the complexity of some models, age 4-7 is recommended.

- explode and implode!
- zoom in and out!
- rotate in 3D!

- Alligator 5 bonus models Set
- Airplane 5 bonus models Set
- Farm tractor 10 bonus models Set
- Racing car 10 bonus models Set
- Elephant 10 bonus models Set

STEM inspired!
